

FACT SHEETS

ENGINEERING EECC HYDROGEN NETWORK H2 COMPRESS STATION UNIT AND PIPELINE CONNECTION

 **New
energies**

**CLIENT
ENAGAS**

Location / Country

Zamora
SPAIN

Completion Year

2027

Project Value

Type of Contract

EPC

This project is part of the H2Med initiative, recognized as a Project of Common European Interest and funded through the European CEF-E (Connecting Europe Facility – Energy) program.

The initiative aims to establish a strategic hydrogen pipeline network across the Iberian Peninsula.

Specifically, the compression station covered under the contract awarded to Intecsa will also enable the connection of the hydrogen network with neighboring Portugal.

Scope of Services

The project includes the development of basic engineering, extended basic engineering, administrative documentation, and integration into the hydrogen network.
